

About TEACH Academy

The Teach Academy is a workshop designed to educate School Counselors, Teachers of all subjects/grade levels, Nurses, and Health Educators about the wide range of career opportunities available in the field of healthcare, and how to advise students interested in pursuing these careers.

Participants will be involved in stimulating, interactive activities to become acquainted with the many opportunities in the field. You will acquire educational resources that can be used in the classroom or as tools to counsel students who are making important career decisions, and you will explore topics relating to the current professionals' shortage areas.

Additionally, each participant will have job shadowing experiences on site at the Reading Health System with local practicing healthcare professionals. You will learn, first-hand, about specific health occupations.

TEACH Academy 2018

Teachers Exploring and Advocating Careers in Health
